

Our Belief and Mission for Our Deaf and Hard of Hearing Students

We believe the student with a hearing loss is a learner with the same needs and aspirations as others in the classroom. The goals of the Kindergarten to Grade 12 curriculum are the building blocks from which to develop the student's individual program. Collaboration between professionals and parents is essential in determining the best possible program for the individual student. Establishing good communication with students, parents and community service providers will foster the student's social, emotional, communicative and educational development.

It is our mission to provide excellent educational learning opportunities for our Deaf or Hard-of-Hearing students, so that each student is able to reach his or her individual potential.

How We Help our Students Achieve Successful Learning Experiences

- Advocate for the hard of hearing student in the school.
- Collaborate with the classroom and resource teachers involved with the student.
- Assist the school team in developing an Individual Education Plan.
- Provide information on the child's hearing loss, amplification, language development, and ideas of how to communicate with and program for the child in the classroom.

Lambton Kent District School Board Teachers of the Deaf and Hard-of-Hearing
