

It must have been mid to late 80's when we met. A live broadcast i was doing with the Detroit radio station I worked for. Your knowledge and passion for the music I played on that eclectic little show connected us at first. It was always a pleasure to speak with you through the years and your written letters have always made me smile at your kindnesses and adventures. The arc of a friendship is art! Your generous friendship has gifted me with smiles and memories through these decades. Although we are a country away, social media has kept us connected. I have watched you grow as a woman and artist. As I write this, your vinyl bowls, hold necessary treasures at my desk. The lovely amethyst you found on your shoreline sparkles on my window sil. Your eye and your heart are an art filled package. Growth brings new media to your portfolio. It is a joy to see you follow that creative spirit that has always been evident in your life.

I hope you are surrounded by other genuine artist hearts and as we head in to a New Year, this world sure could use more art and creative souls to unmask ourselves and reveal the way we must go for everything beautiful in this world. I hope you have every opportunity to help fill this cup.

Cheers, from your Over Easy DJ friend,

Carey Carlson
