Presentation –	Chris Moore introduced Marie Anger and Ann Pharazyn who are the secondary	
Multidisciplinary	and elementary Multidisciplinary Team Members, respectively	
Teams	The members were told that, in 2017, schools developed teams of up to 6	
	'champions' who are caring individuals in the building that were willing to help to support students	
	The previous year's Climate Survey was used as the starting point for each school team's work	
	Chris noted that often-times the school's team meetings were held after school	
	and he was impressed to see that there were more people in attendance than the	
	5 or 6 'champions' on the team; there were many other staff members who	
	attended to help make the climate in the school the best it could be, and he	
	spoke about some of the things schools are doing to improve the school climate, and engage families	
	 In 2018 Chris, Marie and Ann were brought on and they focus on: wellness; 	
	transitions (Grade 6-7 and 8-9); supporting the elementary guidance role; and, supporting school-based MDTs	
	 The core Multidisciplinary Team's role is to build capacity; Chris said staff become 	
	more invested in the outcome if they're a part of the change	
	Chris, Marie and Ann also support the Board's equity and inclusion efforts	
	Chris noted that additional workshops focused on: trauma-informed practices;	
	cannabis/vaping education; FASD workshops; as well, additional work around	
	equity/inclusion was gained by participating in an 'equity walk' in each school	
	Funding has been provided for social workers to help in secondary schools; they	
	focus on well-being, substance misuse and attendance issues	
	Last year, only 50 parents completed the School Climate Survey but, with a lot of ward, the resume 1.674 Barrett Survey and the dath is time a result.	
	 work, there were 1,674 Parent Surveys completed this time around The social workers found some barriers and have sought to remove them; for 	
	instance, some students with poor attendance, providing a bus pass (funded	
	through Noelle's gift) has helped to correct the situation	
	 In conclusion, it was noted that the team uses evidence-based resources to help 	
	students reduce stress and focus on overall mental wellness
